NOTE: Specific grant pre-proposal forms are enclosed separately

The Nevada Division of Forestry (NDF) is seeking pre-proposals for projects eligible for the US Forest Service, 2017 State and Private Forestry **Landscape Scale Restoration (LSR)**, **Western States Fire Managers (WSFM)**, and the **Hazardous Fuel-Community Protection (HF-CP)** grant programs. Qualifying applicants can submit pre-proposals for one or all of these grant programs. Carefully review the guidelines and complete the appropriate grant pre-proposal form by following the specific criteria and instructions.

GENERAL INFORMATION

In 2010, a team of private and public forestry representatives, with input from broad group of stakeholders from across the state, completed work on the State Wide Forest Resource Assessment. The Assessment consists of two documents (State Wide Assessment Report and State Wide Strategies and Priority Landscape), which are collectively known as the [Nevada Forest Action Plan \(FAP\)](http://forestry.nv.gov/forestry-resources/state-resource-assessments/) (<http://forestry.nv.gov/forestry-resources/state-resource-assessments/>). FAP identifies overall goals and the most critical issues with respect to Nevada's forests and rangelands across all ownerships, and lists strategies for addressing these issues within Priority Landscape Areas. Funds for these grant programs come from the US Forest Service, State and Private Forestry (S&PF) branch, and support projects that address local and statewide rural and urban forest conservation, protection and enhancement needs, FAP strategies, and which provide meaningful, lasting, and measurable outcomes. Nevada's LSR and WSFM applications compete for funds within each respective program with seventeen western states and five Pacific island territories. HF-CP applications compete with states in Forest Service Regions 1 & 4.

PROCESS

This announcement is to solicit pre-proposals from which projects will be selected for development. NDF will select three projects from LSR and ten from WSFM pre-proposal submissions. The number of HF-CP proposals is dependent upon availability of federal funds and demonstration of need.

NDF will work with successful applicants to develop full grant proposals for the western competition. The goal is to have full grant proposals completed by late-March for the HF-CP grant and July 2016 for the LSR and WSFM grants. Once NDF approves the full proposals, they will be submitted to western states competitive evaluation committees for selection and award. If they are selected for funding by the evaluation committee, then they will be made into formal recommendations for Congressional budget allocation. If Congress allocates the necessary funds to fulfill the grant recommendations, those funds will be received by NDF in the spring of the year following that of the application submission. NDF will then develop a subgrant agreement with the project implementors and project work will be able to begin the summer following that of the application submission. For guidance on developing LSR pre-proposals contact Heather Giger hdgiger@forestry.nv.gov, phone 775-684-2500. For WSFM or HF-CP pre-proposals contact Ryan Shane rshane@forestry.nv.gov, phone 775-684-2511.

TIMELINE

February 16, 2016	NDF announces request for project pre-proposals for the LSR, WSFM and HF-Grants
March 24, 2016	HF-CP Pre-proposals due to NDF
Early March-July 2016	Pre-proposal projects selected for development into full proposals. All applicants notified of status.
Late March 2016	NDF works with selected applicants to develop full proposals/applications for the HF-CP competition
March-April 2016	USFS/NDF and other states Review Committee rank Region 1 and 4 HF-CP grants and recommends projects for funding
July 2016	NDF works with selected applicants to develop full proposals/applications for the WSFM and LSR competition
Early August	Final WSFM full proposals due to NDF
Early September	Final LSR full proposals due to NDF

October-November 2016	WSFM Grant Review Teams score and rank west-wide applications for each grant program and recommends projects for funding (Needs to have a box indicating submittal deadline for selected LSR grants)
Late November 2016	States notified on projects selected for funding
Late Spring 2017	Contingent upon congressional appropriations , states sign agreements with the Forest Service for grant dollars
Summer 2017	NDF and successful grant recipients enter into appropriate agreements, projects begin

PROJECT GUIDELINES

GENERAL ELIGIBILITY & SIDEBARS

Eligible Applicants	LSR , WSFM and HF-CP grants - State and local agencies, tribes, non-profit organizations, and educational institutions
	A DUNS# is required to receive funding
Project Purpose & Location	LSR should address local or statewide forest or rangeland resource issues, and broad goals and strategies in Nevada's Forest Action Plan (State Wide Forest Resource Assessment) within the project's priority landscape area. The Nevada Forest Action Plan is available at http://forestry.nv.gov/forestry-resources/state-resource-assessments/
	WSFM and HF-CP projects must be listed in the county's CWPP or other fire mitigation or fuels assessment document.
	HF-CP projects must be located adjacent to planned or recently implemented projects on USFS lands.
	Collaboration among multiple entities on the project is important and encouraged
Funding Request Amount	Projects that utilize approximately \$240,000 in grant funds are desired ² . If funded, payments are on a reimbursement basis (after work is successfully completed and paid for by recipient)
Project Time Frame	One to three years
Eligible Lands	While project work can occur on all lands, grant funds can only be used for activities on non-federal lands. Project coordination with the USDA Forest Service and other public land management agencies is encouraged.
Ineligible Activities	Work on federal land, research and any construction activities are not eligible for grant funding. (Construction includes new or improved structures, roads, bridges and culverts, even if in connection to a thinning or restoration project. If these activities are part of the overall project, they can be used as project leverage.)
	WSFM and HF-CP Grants exclude maintenance on previous federally funded fuels projects, preparedness and suppression capacity building (e.g. purchase of fire department equipment), small business start-up funding, and GIS/database development.
Budgets	Refer to NDF Budget Guidelines and Restrictions for determining allowable grant fund expenditures. http://forestry.nv.gov/grants/

² The state is eligible to apply for up to \$300,000 per grant and wishes to submit robust applications. NDF will include indirect and other associated project costs and will work with successful applicants on the final budget.

PRE-PROPOSAL REQUIREMENTS

Successful pre-proposals start with well-planned project ideas. Project pre-proposals that clearly address a pressing need or issue in an efficient, timely and cost-effective manner are most likely to be selected for full proposal development. Projects that leverage resources through partnerships and are designed to be sustainable will improve competitiveness among regional applicants. Pre-proposals should be for specific projects not merely

concepts. Projects ready or near ready to implement will compete better. Information required for the LSR, WSFM and HF-CP pre-proposals are different. Review the criteria for each and complete the correct form. Project pre-proposal forms, NDF's Budget Guidelines and Restrictions, and examples of successful applications can be found at <http://forestry.nv.gov/grants/>.

GRANT PROGRAM PRE-PROPOSALS

LANDSCAPE SCALE RESTORATION (LSR) GRANTS— PRE-PROPOSAL

NDF seeks Landscape Scale Restoration (LSR) projects that address local or statewide forest and rangeland resource issues, along with goals and strategies in Nevada's [Forest Action Plan](http://forestry.nv.gov/forestry-resources/state-resource-assessments/) (FAP) (<http://forestry.nv.gov/forestry-resources/state-resource-assessments/>). Projects must address significant issues, landscapes of concern, and focus on conserving working forests and rangelands, protecting forests and rangelands from harm, and/or enhancing public benefits from trees, forests and rangelands.

Innovative projects are sought that integrate various programs (e.g., Forest Health, Urban & Community, Stewardship, Fire, etc.) and partners and cross any combination of ownership, management or jurisdictional boundaries. Cross-boundary projects are encouraged as they expand project outcomes at watershed, regional and state levels. For example, within a watershed or Priority Landscape Area, multiple landowners and organizations might work together to do any combination of the following:

- Assess needs and develop plans (e.g., Landscape Scale and landowner Forest and Range Stewardship Plans, and watershed action plans, identify appropriate tree seed sources for various climate scenarios)
- Conduct actions or treatments on a landscape scale to increase and maintain vegetation diversity and resilience over time. This includes actively managing urban and rural forests and rangelands for goods and ecosystem services. (e.g. treatments to improve and/or restore forest and rangeland health, recreational opportunities, water resources, riparian areas, wildlife habitat; reduce wildfire, noxious weeds, development pressure and impacts from undesignated recreation)
- Address community health benefits from trees, forests or rangelands or issues such as stormwater, air quality, energy use, or invasives
- Provide education and outreach to train landowners or organizations.(e.g. workshops, statewide surveys to assess landowner attitudes and targeted marketing to increase statewide forest landowner participation)

All projects should include an outreach or educational component that increases a relevant audiences' understanding about the issue being addressed through the project work. Examples of successful cross-boundary projects go to <http://forestry.nv.gov/grants/>.

INSTRUCTIONS FOR PRE-PROPOSAL FORM

Project should address FAP statewide or Priority Landscape Area issues and strategies (see Nevada FAP).

Complete the 2017 LSR Pre-proposal form at: <http://forestry.nv.gov/grants/>.

Confine the narrative to the box size and stay within the character designated limits (including spaces). Do not change the font or the type size. Only applicants with an approved pre-proposal can submit a full proposal. Additional information will be required for the full proposal.

Attach a Map of the Project Area to the Pre-Proposal Form—with a north arrow and geographic locator (such as latitude and longitude or GPS coordinates). Denote nearby cities to serve as reference points.

LSR funds can only be spent on non-federal lands, but federal contributions can be used as leverage. To be competitive, projects must show partner leverage. Leverage can be in-kind, can include federal resources and be for work adjacent to the area in which grant funds will be used (more than 50/50, if possible).

Although the official 2017 application is not yet available, past successful Nevada grant applications are good examples for context, substance and clarity. These resources are available to assist applicants in completion of this form are located at <http://forestry.nv.gov/grants/>.

DUE DATE: July 1st, 2016 - Email Pre-Proposal to: hdgiger@forestry.nv.gov and for questions, contact Heather Giger at the above email or phone 775-684-2500.

WESTERN STATES FIRE MANAGERS (WSFM) & HAZARDOUS FUELS-COMMUNITY PROTECTION (HF-CP) GRANTS – PRE-PROPOSAL

NDF is seeking pre-proposals for projects that mitigate risk within Wildland Urban Interface (WUI) areas. Proposals should address issues identified in Community Wildfire Protection Plans (CWPP) or other wildfire mitigation planning documents, the broad goals within Nevada's Forest Action Plan, and demonstrate collaborative interagency planning and implementation coupled with citizen ownership. Emphasis is on hazard fuel reduction, restoration of fire-adapted ecosystems, and mitigation education within the WUI, and Wildfire Protection Planning.

The types of allowed projects focus on achieving these goals through:

- Reducing Hazardous Fuels and Restoring Fire-adapted Ecosystems
- Improving Mitigation Education in the Interface
- Planning

Note: HF-CP projects must be on non-federal land, align with, and be adjacent to Forest Service hazard fuel reduction projects. All HF-CP projects are only for reducing hazardous fuels/restoring fire-adapted ecosystems.

MINIMUM CRITERIA CHECK-LIST—FOR PROJECTS TO BE ELIGIBLE FOR FUNDING

- Is the project in an area identified specifically in the Community Wildfire Protection Plan (CWPP) or Nevada Forest Action Plan (FAP)? If not, will the CWPP be updated to include the project prior to competitive grant review submission (August 2016)?
- Can a copy of the page from the CWPP that the project or priority area is listed on be provided?
- Can a map (in pdf format) be provided of project area where work will occur with associated geographic descriptors; i.e., north arrow, prominent features, approximate project location/boundary, etc.?

INSTRUCTIONS FOR PRE-PROPOSAL FORM

The official current year's WSFM & HF-CP grant applications and guidance are not yet available. Complete the prior year's WSFM grant application and/or the 2016 HF-CP grant application (found at <http://forestry.nv.gov/grants/>) to apply as pre-proposals for these programs. Applicants must fit all information into the allotted box space for each question. All boxes must be filled in on the applications. If a box does not apply to the project, fill in that space with N/A.) ***Hold your mouse arrow over each block on the application for further instructions.*** Additional resources to assist in completion of this form are located on page 7 of this packet.

Guidelines by box number follow:

WSFM / HF-CP Box 1 & 2: Applicant and Project Information—fill out all boxes.

WSFM Box 3 / HF-CP Box 3: Project Expenses—Projects up to \$260,000 are sought. The applicants planned expenses should all be recorded in the "contractual" line of the budget. Note the other boxes will now be treated as NDF only grant expenditures because all money to applicant comes as a subgrant. NDF will require the applicant to show in-kind or hard/cash match (WSFM 1:1, HF-CP ≥10%). To increase ownership in projects landowners should be encouraged to participate not only in planning but in implementation which will increase match, instill responsibility and likely increase project longevity through owner maintenance. Match cannot come from a federal source and needs to be for work directly on the project. Match can include training hours valued at an accepted rate and donated labor/equipment. Hard match is actual dollars spent other than federal grant funds within the specified scope of work. The totals in these boxes will add automatically when all data is entered into the fields. If the total did not add correctly, go back, tab through each box, and see if that fixes the addition.

WSFM Box 4: Budget Narrative—must give specific details for each grant expenditure item (not matching funds) included in the “Contractual” line of Box 3. For example, itemize and quantify personnel/labor, fringe benefits, travel, equipment, supplies, contractual, other, and indirect costs. Explain exactly how grant dollars will be spent and how these expenditures tie directly to the project goals and objectives.

WSFM Box 5 / HF-CP Box 5: The Project—the description of project area and challenges—applicants must give an overview of the project and point out the hazards and clearly show the need for work in this area. If applying for a fuels reduction project, describe the vegetation types. It is important to define the problems and challenges so when you get to box 7 you are clearly stating how the funding will be used to address the challenges in this box.

WSFM Box 6: Relation to Forest Action Plan/CWPP—clearly describe how the project fits into the broad goals of a forest action plan (Enhancing, Protecting and/or Conserving) and/or CWPP goals and objectives. It is important to describe how the project meets the goals of one or both of these planning documents. Relationships to the three goals within the Cohesive Wildfire Strategy could also be included in this section. When citing the CWPP provide specific language of project and priority as it relates to this proposal.

WSFM Box 7 / HF-CP Box 6: Proposed Activities—this section must clearly explain exactly how the grant dollars will be spent on this project and outline what will be accomplished. Unlike the overview, this will provide the specific details of the project using measurable units where applicable. Specify the location of the project, how many communities and people will be impacted, and describe treatment methodology and who will be doing the project work.

WSFM Box 8: Landscape—describe the landscape this project influences. Show how the project has or will have impact outside the immediate project area. For example, a project in a community may compliment a Forest Service project on their land where they are creating a fuel break around your community defensible space project. Give specifics on how this project will tie into the larger picture of community protection or education. For information/education and/or planning projects, explain how your project compliments or enhances those by other agencies or groups and/or ties into a greater goal. Explain the who, what, when, where, why and how of its anticipated impacts. Note, be specific when naming USFS, private, or NDF projects and include acres. Think global (watershed) not local.

WSFM Box 9 / HF-CP Box 7: Project Collaboration—describe the contributions each partner will make to the project by stating the collaborating partners name and what they will be contributing to the project such as manpower, equipment, matching funds, etc. This should include the partners listed in Box 3 (matching share) but may also include federal and other partners that are contributing but are not eligible to use as match. Create a partner list and state what they are contributing concisely; actions not sentences.

WSFM Box 10 / HF-CP Box 4: Project Timeline—must include such things as: begin/end dates, milestones, quarterly accomplishments, etc. Create a timeline for the most significant activities included in *the Proposed Activities/Scope of Work* sections and list: acres, meetings, events and people.

WSFM Box 11 / HF-CP Box 8: Project Sustainability—must clearly describe the who, what, when, where and why of how this project will remain effective and be sustained over time for each of the four elements below. When answering, be concise and provide only relevant details.

- Environmental Factors (vegetation regrowth): describe the maintenance requirements unique to this project based on site characteristics i.e., present and future vegetation occupying the site, growth rates, natural fire return intervals or any other environmental factor that affects the continued maintenance of this project
- Education (programs and methods): describe how landowners have been trained and educated to maintain the project and explain their understanding of the needs and expectations for the project’s maintenance. If this is an information/education project, make sure to explain how it will be delivered, the audience you are targeting, and specific deliverables.
- Monitoring: describe who will be responsible for monitoring the project, what qualifications they have if

they are not obvious (i.e. State Forestry personnel, Fire Safe Council member, Fire Department personnel, etc.), and at what intervals they will be checking (i.e. yearly, quarterly, etc.); clearly describe timelines, and milestones.

- **Commitment:** describe the commitment by the individual/community to maintain this project into the future, (i.e. state laws, CWPP terms, signed landowner agreements or other documents or agreements that hold the sub-grantee accountable for project maintenance over time). If this is an information/education project, make sure you explain the commitment to carry this program forward and update as necessary.

Attach a Map of the Project Area to the Pre-Proposal Form— with a north arrow and geographic locator (such as latitude and longitude or GPS coordinates). Denote nearby cities to serve as reference points.

HF-CP DUE DATE: March 24, 2016 & WSFM DUE DATE July 1, 2016: Email Pre-Proposal to: rshane@forestry.nv.gov and for questions, contact Ryan Shane at rshane@forestry.nv.gov or 775-684-2511.
